# Appendix D

# Plant and Wildlife Species of Concern that may potentially occur on or near the Cow Creek Pod.

Plant Species of Concern <sup>1</sup>						
Species	Counties of Distribution	Wyoming Range	Status <sup>2</sup>	Probability of Occurrence	Habitat	
Smallflower androstephium (Androstephium breviflorum)	Carbon, Sweetwater	Peripheral	G5/S1	moderate potential	open, south-facing slopes; erosional slopes; deep sandy-silty-loamy soils	
Crandall's rock-cress ( <i>Arabis crandallii</i> )	Carbon, Sweetwater	Regional Endemic	G2/S1	unlikely	rocky-sandy ridges in juniper woodlands	
Hayden's milkvetch (Astragalus bisculatus var haydenianus)	Carbon, Fremont, Lincoln?, Sweetwater, Uinta?	Peripheral	G5T4?/ S1	moderate potential to occur along wet draws and riparian areas	moist clay soils; spring draws; associated with dense gramanoids and shrubs	
Wolf's orache (Atriplex wolfii)	Carbon, Sweetwater	Regional Endemic	G3G4/ S1	moderate potential to occur in greasewood fans & flats	alkaline or clay soils; elevated mounds near aquatic sites; associated with greasewood	
Payson's tansymustard (Descurania pinnata ssp. paysonii)	Carbon, Laramie, Sweetwater	Regional Endemic	G5T3?/ S2	potential to occur within the vicinity of the Cow Creek pod	stabilized sand dunes	
Little golden-aster (Heterotheca pumila)	Carbon (unlikely in project area)	Regional Endemic	G4/S1	highly unlikely	sub-alpine and mountainous habitats	
Weber's scarlet-gilia (Ipomopsis aggregata ssp weberi)	Carbon, Albany	Peripheral	R2, G5T1T 2/S1	highly unlikely	openings in coniferous forests and scrub oak woodlands.	
Rusby's stickleaf ( <i>Mentzelia rusbyi</i> )	Carbon, Albany	Peripheral	G3G4/ S1	unlikely	barren , rocky slopes or banks with coarse, thin soils	

## APPENDIX D: PLANT AND WILDLIFE SPECIES OF CONCERN

Plant Species of Concern <sup>1</sup>						
Species	Counties of Distribution	Wyoming Range	Status <sup>2</sup>	Probability of Occurrence	Habitat	
Gibben's beardtongue (Penstemon gibbensii)	Carbon, Sweetwater	Regional Endemic	G1/S1 BLM	moderate potential to occur  (known to occur within 20 miles of project area along southern border of Carbon and Sweetwater Counties)	barren, south-facing slopes on loose, pale, sandy-clay derived from Brown's Park Formation; may occur in grass-dominated sites with scattered shrubs; semibarren fringed sagebrush (A. frigida) / thickspike wheatgrass communities with 15-20% vegetation cover, or ashy-clay barrens on steep slopes amid Cercocarpus montanus; also may occur on outcrops of Green River Formation on steep, yellowish sandstone-shale slopes below caprock ridges	
Rydberg twinpod ( <i>Physaria vitulifera</i> )	Carbon, Albany	Regional Endemic	G4/S1	unlikely	rocky meadows; montane transition areas; bare ground in and among sagebrush associations ( <i>Artemisia</i> spp)	
Many-headed broom groundsel (Senecio spartoides var multicapitus)	Carbon, Sweetwater	Peripheral	G4/S1	potential to occur within the vicinity of the Cow Creek pod	stabilized sand dunes	

## APPENDIX D: PLANT AND WILDLIFE SPECIES OF CONCERN

Wildlife Species of Concern <sup>1</sup>					
Common Name	Scientific Name	Sensitivity Status/Rank <sup>2</sup>			
Mammals					
Wyoming pocket gopher	Thomomys clusius	R2, G2/S1S2			
Swift fox	Vulpes velox	C, R2, G2/S2S3, SSC3			
Birds					
Northern goshawk	Accipiter gentilis	R2, G5/S2S3B, S4N, SSC4			
Columbian sharp-tailed grouse	Tympanuchus phasianellus	R4			
Snowy plover	Charadrius alexandrius	R2, G4/S1B, S2?N			
Burrowing owl	Athene cunicularia	R2, G4/S3B, SZN, SSC4			
White-faced ibis	Plegadis chihi	R2, G5/S3B, SZN, NSS3			
Long-billed curlew	Numenius americanus	R2, G5/S1B, SZN, NSS3			
Brewer's sparrow	Spizella breweri	G5/S3B, SZN			
Sage sparrow	Amphispiza belli	G5/S3B, SZN			
Reptiles	_				
Smooth green snake	Liochlorophis vernalis	G5/S2			
Amphibians					
Northern leopard frog	Rana pipiens	R2, G5/S3, NSS4			
Great Basin spadefoot	Spea intermontana	G5/S4, NSS4			
Boreal toad	Bufo boreas boreas	R2/R4, G4T4/S2, NSS2			
Columbia spotted frog	Rana pretiosa	R2/R4, G4/S2S3, NSS4			
Fish					
Roundtail chub	Gila robusta	G2G3/S2?, NSS1			
Bluehead sucker	Catostomus discobolus	G4/S2S3, NSS1			
Flannelmouth sucker	Catostomus latipinnis	G3G4/S3, NSS1			
Colorado River cutthroat trout	Oncorhynchus clarki pleuriticus	G4T2T3/S2, NSS2, FSR2/R4			

<sup>1 -</sup> Sources: Dorn 1992, Fertig and Beauvais 1999, WYNDD 2000 and 2001

#### Global Rank/Definition

- G1 Critically imperilled globally because of extreme rarity (5 or fewer occurrences or very few remaining individuals) or because of some factor of its biology that makes it especially vulnerable to extinction (Critically endangered throughout range).
- G2 Imperiled globally because of rarity (6 to 20 occurrences) or because of other factors demonstrably making it very vulnerable to extinction throughout its range (Endangered throughout range).
- G3 Either very rare and local throughout its range or found locally (even abundant at some of its locations) in a restricted range, or because of other factors making it vulnerable to extinction throughout its range (21 to 100 occurrences; Threatened throughout its range).
- G4 Apparently secure globally, though it may be quite rare in parts of its range, especially at the periphery.
- G5 Demonstrably secure globally, though it may be quire rare in parts of its range, especially at the periphery.

#### State Rank

<sup>2 -</sup> Definition of status:

### APPENDIX D: PLANT AND WILDLIFE SPECIES OF CONCERN

- S1 Critically imperiled in Wyoming because of extreme rarity (five or fewer occurrence, or very few remaining individuals) or because of some factor of its biology making it especially vulnerable to extinction (Critically endangered in state).
- S2 Imperiled in Wyoming because of rarity (6 to 20 occurrences) or because of other factors demonstrably making it very vulnerable to extinction throughout its range (Endangered in state).
- S3 Rare in Wyoming (on the order of 20+ occurrences) (Threatened in state).
- S4 Apparently secure in Wyoming.
- S5 Demonstrably secure in Wyoming.

#### Other Codes

- T Rank for a subspecific taxon (species or variety); appended to the global rank for the full species.
- ? Assigned status questionable.
- R2 Designated sensitive in U.S. Forest Sevice Region 2
- SSC3 WGFD Species of Special Concern (SSC) in which 1) habitat is not limited, but populations are greatly restricted or declining and extirpation appears possible; 2) habitat is limited or vulnerable, although no significant recent loss has occurred, and populations are declining or restricted in numbers or distribution, but exterpation is not imminent; or 3) significant habitat loss is ongoing, but the species is widely distributed and population trends are thought to be stable.
- SSC4 WGFD SSC in which 1) habitat is stable and not restricted, but populations are greatly restricted or declining and exterpation appears possible; 2) habitat is limited or vulnerable; although no significant recent loss has occurred and species is not sensitive to human disturbance populations are declining or restricted in numbers and/or distribution but extirpation is not imminent; 3) habitat is restricted or vulnerable but no recent or on-going significant loss has occurred; species may be sensitive to human disturbance; species is widely distributed and population status is suspected to be stable; or 4) significant habitat loss is on-going but populations are stable or increasing and not restricted in numbers or distribution.
- BLM BLM-identified Special Status plants in the Great Divide Resource Area, Rawlins District.
